

Access your entire computer content from anywhere.

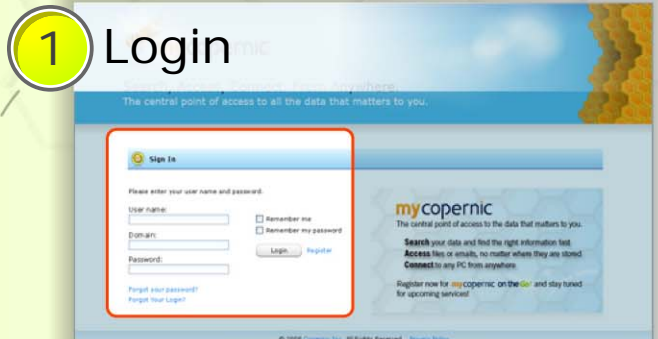

myCopernic on the Go! provides quick and easy access to your computer content from anywhere, using a remote PC or a mobile device. Based on the CTIA award-winning Copernic Mobile, it allows searching, accessing and downloading content such as files, emails, organizer items, music and pictures stored on your PC. Its lightweight user interface adapts to the type of remote device used (PC browser, iPhone or smartphone) in order to provide the best user experience.

- Forget syncing your home and office PC**
 Syncing is no more needed, get the files you need when you need them without wasting time. myCopernic on the Go! lets you quickly search for the files or emails that you need. Preview and download the found content on your mobile phone or remote PC.
- Keep control over your data**
 With myCopernic on the Go!, your data stays where it should: on your computer. No need to upload to a third party server to get access. This stops your stuff from becoming fragmented and falling into another entity's service or site.
- Keep your data private**
 The access to your personal computer is protected by a secure login that you create and that is known only by you. Encrypted connections ensure your privacy at all time.

And more!

Be free, stay connected.
