

Getting Started With myCopernic on the Go!

1 Creating your myCopernic account

1. After your myCopernic purchase, you will receive an email with an activation URL.
2. Use the URL contained in the email with a computer to create your myCopernic account.

➡ You now have an account!

To perform searches and access your files remotely, please proceed to the computer setup.

2 Computer setup

1. Make sure your home or office computer has a supported desktop search application installed:
 - Copernic Desktop Search ¹
 - Windows Desktop Search
2. Download [myCopernic connector](#) ² and install it on your home or office computer.
3. Set up the connector and indicate which desktop search application you wish to use.
4. Activate the connector by entering your myCopernic account name and password.

➡ Your computer is now ready to be accessed remotely!

To access your files, follow the instructions in step 3.

3 Accessing your files

1. Go to <http://mycopernic.com>
2. Log in by entering your account name and password.
3. If you are using a remote computer:
 - a. Insert a search term in the myCopernic on the Go! search box available on the home pageOR
 - b. Click on the myCopernic on the Go! logo to go to the service home page and enter a search term in the search box available on top of page
4. If you are using a mobile device:
 - a. You are now on myCopernic on the Go! home page.
 - b. Enter a search term in the search box

➡ You are now ready to find, preview and download your files!
